DETAILED ACTION

This is the first action relating to serial application number 10/723,869 filed 11-26-2003.

Claim 1 is currently pending.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The examiner has accepted the drawing filed with this application as formal drawing.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a roller chain and most significantly requires the pins, the rollers and the height of the inner plates respectively, satisfy the relationships: $0.72P \leq D \leq 0.79$, $0.40P \leq d \leq 0.44P$ and $0.96P \leq H$, where P is the chain pitch, D and d are the outside diameter of the rollers and the pins respectively, and H is the height of the inner plates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ledvina et al. (5,07,697), Templin (4,143,512), Pfrank et al. (3,448,629), Mckeen (4,117,738) disclose a roller chain but none clearly disclose the roller/ pin relationship as claimed.
